

MODULITE

INNOVATE.
DISPENSE.
SUCCEED.

MADE IN EUROPE
WITH RECYCLED
ALUMINIUM

Brewfitt

Versatility at its finest

The fonts in the Modulite series consist of 2 main elements: The first one being the **core**, which connects to the bar and holds the tap, mini loom and optional lighting.

The second element is the **interchangeable jacket** which is designed to allow for infinite personalisation options.

Keep the core, change the jacket to renew the image of the font and to prepare your towers for events, festivals, brand changes, campaigns...

A sustainable tower

Modulite is made with recycled aluminium. The raw materials are sourced with a reduced carbon footprint in mind by using mainly green energy throughout the supply chain. Both the core and the jacket are fully recyclable.

Low cost of ownership

From the easy access to the inner works of the font to the effortless refitting of new jackets, everything is geared towards optimising cost of ownership. If a tower gets damaged, Modulite allows for refitting only the affected parts and not the entire tower. Keep the core, change the jacket, it only takes a minute.

Quick install

Due to its modular nature, Modulite is very easy to handle and therefore easy to install.

The sky is the limit: Infinite customisation options

Modulite gives you endless possibilities: Try different materials, shapes, measures... to create a distinctive and unique tower that fits into any environment.

Your own design or we help creating it for you

Design your own font and we manufacture it for you, or if you prefer, our team of designers will create the tower you've been waiting for.

Suitable for all

Beer, water, wine, juices... any drink that is dispensed on draft can benefit from the advantages and the adaptable looks of Modulite.
